Partners in Environmental Stewardship

St. Louis District

Clarence Cannon Dam & Mark Twain Lake

SITUATION

1. The 6 missions of Clarence Cannon Dam and Mark Twain Lake are to provide flood control, hydropower generation, recreation, environmental stewardship, water supply and navigation.
2. The Environmental Stewardship mission provides for the management of grasslands, wildlife habitat, forests and watersheds. It also provides for the protection of natural and cultural resources.
3. The 5 year downward budget trend has detrimentally impacted our ability to maintain our natural resources in a healthy and sustainable condition.
4. Past stewardship investments in our natural resources will not sustain. Diminishing habitats will have a profound affect upon wildlife populations and potentially the regional economy.
5. Our goals are to provide diverse wildlife habitat, to protect critical resources and ecosystems and to provide an enjoyable outdoor recreational experience to all our guests visiting Mark Twain Lake.

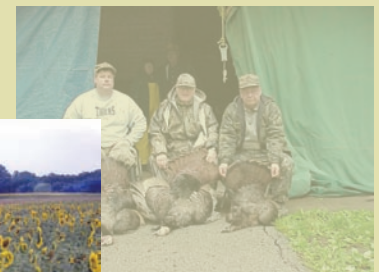

An initiative is underway for Partnership in Environmental Stewardship

- ✿ The Corps is working at national, state and local levels to expand public/private partnerships for environmental stewardship.
- ✿ The Corps will continue to explore and utilize ways to cooperate and partner with non-Federal units of government and non-profit entities to leverage our resources.
- ✿ The environmental stewardship staff at Mark Twain Lake is dedicated to serving the public and the wise use of resources.

Ideas under consideration:

- Partnerships/Handshake Agreement
- Challenged Cost Share
- Community Involvement/Communication
- Collaborate on New Initiatives
- Volunteers

Unless we practice conservation, those who come after us will have to pay the price of misery, degradation, and failure for the progress and prosperity of our day.
Gifford Pinchot
